CLASSROOM LESSON PLAN

GRADES 9 TO 12

CACTI NAME PLACEHOLDERS

with Giovanna Zara

STUDENTS WILL BE ABLE TO

- create cacti themed name holders
- demonstrate typography when writing names on the holders
- master the making process by following the needed order in which to make their name holders

ESSENTIAL QUESTIONS

- What are the uses of a themed kit?
- How can you use a theme when planning a party?
- What is the order needed to create name placeholders properly?

MATERIALS

- [ ] GelliArts® Cacti Kit
- [ ] Scissors
- [ ] Pencil or Marker
- [ ] Tacky Glue
- [ ] Additional popsicle sticks if you require more than the given 12 within the kit

NOTES FOR THIS CLASS

STEP BY STEP

1. *This lesson is created under the assumption students have printed with a GelliArts® plate beforehand.

2. Create Prints by using the supplies found within your GelliArts® Cacti Kit to make colorful prints for your cacti plants and pots by following the instructions found within it.

3. Trace and cut out your plants and pots with either the templates provided within the kits or freehand draw them

4. Proceed to cut out the cacti shapes and pots for assembly.

5. Add names and other creative elements to your pots, such as small designs and shapes.

6. Glue plants to their pots.

7. Glue assembled potted plants to their own popsicle sticks. This lesson can be adapted to a variety of themes and designs not just for cacti. But this lesson is also used to display the flexibility of one of our kits (the Cacti Printing Kit).
